

SCALABLE & COMPREHENSIVE CYBERSPACE TRAINING ENVIRONMENT

OFFENSIVE & DEFENSIVE CYBER PLUS INFORMATION OPERATIONS

From replicating social media environments that facilitate enemy operations to delivering nation-state intelligence, surveillance, and reconnaissance of mission-critical infrastructure, SMEIR prepares our nation's military with multi-domain training and intelligence.

WEBSITE & SOCIAL MEDIA REPLICATION

Realistic replication of hostile networks, social media, local and host nation government, international, regional and local news websites, insurgent crowdsource funding pages, and deep web.

VIRTUALIZED NETWORKS

Drag and drop network components into blueprint models, with customizable attributes and pressing play, ensures the training environment is automated, innovative and scalable.

EXERCISE DEVELOPMENT & MANAGEMENT TOOL

Scenarios prepare participants to operate efficiently within today's volatile cyber battlefields. Manage and control all training content into exercises in real time.

MALICIOUS TRAFFIC GENERATOR

Run automated cyber threats or penetration test vulnerabilities within mission critical infrastructure. Offensive or defensive attacks.

SUBJECT MATTER EXPERTS

IDS can provide technical support, assistance with cyber range exercises, serve in an advisory role, and/or assist with scenario evaluation.
